DISTRICT

Close-Act Theatre Company was founded in 1991. Originates from a collaboration between designers, actors, dancers, choreographers, and musicians. Although new acts are being developed from different artistic disciplines, the style of the visual creations is still one of the unique trademarks of Close-Act. The artistic directors of Close-Act are Hesther Melief and Tonny Aerts. Close-Act is renowned for interactive street theatre. Their unique form of theatre is performed in, between and above the public. "Let us move, draw and carry you into the world we create". What does it mean, interactive theatre? It's most comparable to reality whereby the most important thing is the emotional rush you get. In these performances you can feel all kinds of emotions, like love, seduction, fear, or compassion, it's the ultimate way to intensify your perception of the performance. The story, how unreal it may seem, becomes reality. You are part of it just like all others around you.

Performers: *Stephan Bikker, Kay Melief and Anna Laura Zurkirchen*
